

# ORIGAMI RISK

## Customizable Claim Management Technology

### Empowering You to Make Claim Decisions Based on Unique Data

As a SISCO client, you benefit from real-time access to the robust, award-winning claim administration platform, Origami Risk. This interactive and integrated claim command center helps you to identify and reduce the financial risk associated with claims. The platform is fully configurable and offers all of the features and functionality needed to aggregate, analyze and act upon data insights. SISCO has configured Origami Risk help you to be more efficient, informed and effective through:

- » An intuitive interface that helps you easily collect comprehensive risk data.
- » Customized reports that help visualize and standardize information for easy analysis.
- » Flexible rule-based tools to automatically prompt required workflows to keep the claim process moving.
- » Real-time data that allows you to easily compare claims, assess severity and make correlations that spur actions.

### Effective Claim Resolution & Prevention

Through Origami, SISCO provides a claim management solution that helps bring claims to a quick resolution (or even prevent them from occurring) by:

- » Streamlining workflow processes.
- » Improving benchmarking and analysis.
- » Ensuring compliance with changing regulatory requirements.
- » Customizing the application from screen design to workflow creation.

Origami provides an enterprise-level overview of your data by integrating with internal departments including HR, accounting, safety and more. By streamlining how we collect, consolidate and standardize data from a variety of sources, we are able to determine program drivers, coverage and claim details, and employee data. SISCO is then able to take these insights and develop a plan of action to enhance your claim program.

## Origami Key Features

### Dashboards & Reports

SISCO is able to create client specific dashboards and reports based on the individual or collective needs of any organization. Additionally, we offer a suite of standard reports available to our clients at the press of a button.

### Document Management

All of your claim documents are quickly uploaded to Origami by our SISCO team members providing a solution to organize, search, monitor and retrieve your claim documents on demand. Never search through emails and files for a claim document again, Origami provides a single, secure storage location for all your claim documents.

### Compliance Reporting

A robust compliance reporting capability allows SISCO to streamline, track and report all compliance data directly in Origami, where that information is already stored. Clients can easily view data elements used in all compliance reports.

### Claim Reporting

Clients can report defined claim data directly into the system through a variety of user-friendly methods, including from a mobile device or from automated data feeds from other client systems. Additionally, our clients benefit from customized approval workflows and root cause analysis tools.

## Technology & Security

Origami Risk is hosted on a secure web-based platform allowing the system functionality and security features to continually evolve without the installation or maintenance of any hardware. As the number #1 ranked risk management information system (according to Advisen RMIS Review), Origami Risk provides clients with a fast, secure, reliable and flexible platform for all of their claim management needs.

SISCO clients can rest assured that their data is secure in every step of the claim process. Origami Risks maintains compliance with rigorous SOC 2 and NIST 800-53 security controls and has joined the EU-U.S. Privacy Shield Framework and Swiss-U.S. Privacy Shield Framework.
