

CUSTOMIZED SOLUTIONS FOR AMBULATORY SURGERY CENTERS

For over 50 years, physicians have turned to Ambulatory Surgery Centers (ASCs) to conduct business, largely due to provider autonomy and control over quality and governance. Advantages to patients include cost effectiveness and flexibility in scheduling. RCM&D's holistic approach to healthcare risk management can help enhance patient safety and protect your ASC's bottom line.

According to Healthcare Finance, over half of all outpatient surgical procedures are performed at ASCs in the U.S., and that number will continue to rise as outpatient surgeries gain popularity.

Over 50%

of outpatient surgical procedures are performed at Ambulatory Surgery Centers in the U.S.

Partner with RCM&D

Since ASCs face risks across the enterprise, regular risk assessments are imperative. Proactive risk management is key to identifying and addressing potential exposures before they result in patient injury, financial loss and reputational harm. At RCM&D, we understand the challenges ASCs face, and we're here to help you mitigate those risks. Our experienced risk consultants specialize in creating tailored solutions to address your specific needs while protecting your ASC's reputation, financial stability, and most importantly, your patients' well-being.

Ready to elevate your risk management strategy? Talk to a trusted advisor today to learn more about the solutions RCM&D has in place to mitigate risk for Ambulatory Surgery Centers.
