

# Risk Management Underwriting Solutions for Physicians & Advanced Practice Providers

SISCO provides broad underwriting services for a range of alternative risk vehicles, including insurance captives and risk retention groups.

These risk financing vehicles are typically bound to the legal structure of the healthcare system and require exhaustive underwriting if the risk financing program includes professional liability insurance coverages for physicians and/or advanced practice providers.

SISCO's unique underwriting services for professional liability insurance coverage eliminate the need for healthcare entities to employ administrators to carry out these responsibilities. In addition, SISCO can complement the in-house underwriting process and relieve administrative burden by creating efficient and effective workflows to assure compliance with the self-insurance program underwriting requirements.

## OUR UNDERWRITERS WILL:

- ✓ Communicate, collect and analyze all data required for underwriting.
- ✓ Analyze and verify current risk management education programs for compliance with insurance renewal standards.
- ✓ Decide which physicians/providers meet the specified underwriting criteria.
- ✓ Assist with the renewal application process.
- ✓ Obtain and review professional liability claims history according to underwriting criteria.

## QUESTIONS? Talk to a Trusted Advisor.

Contact your trusted SISCO advisor to learn more about how our underwriting services can help your healthcare practice identify exposures and create customized strategies to mitigate risk.
